HIT DATA EXPRESSING SYSTEM FOR HOME BETTING SYSTEM TERMINAL
FUJITSU LTD
Inventor(s): ; TERAUCHI SEIICHI
Application No. 63085464, Filed 19880408, Published 19891016

Abstract: PURPOSE: To use a totalizator more effectively by storing data for hit discrimination and betting data which are sent from a broadcast station and discriminating a hit of betting data and expressing the hit with a picture and sounds.

CONSTITUTION: A teletext processing part 1 of a home betting terminal receives character broadcast from the broadcast station and stores data for hit discrimination in a data storage part 3. Before this reception, a customer inputs specific betting data to a betting processing part 2 with remote key pads or the like to hold this in a betting data storage part 4. Data for hit discrimination and vote data are compared with each other by a comparing part 5 provided with a CPU or the like of the betting processing part 2; and when a hit of betting data is discriminated, a picture is projected on a television or a fanfare is emitted with synthesizer sounds to express the hit by a hit expressing part 6 of the teletext processing part 1. Thus, the customer is more deeply impressed with the hit.

ABSTRACT:

 PURPOSE:To use a totalizator more effectively by storing data for hit
discrimination and betting data which are sent from a broadcast station and
discriminating a hit of betting data and expressing the hit with a picture

and sounds.

 CONSTITUTION:A teletext processing part 1 of a home betting terminal
receives character broadcast from the broadcast station and stores data for
hit discrimination in a data storage part 3. Before this reception, a
customer inputs specific betting data to a betting processing part 2 with
remote key pads or the like to hold this in a betting data storage part 4.
Data for hit discrimination and vote data are compared with each other by a
comparing part 5 provided with a CPU or the like of the betting processing
part 2; and when a hit of betting data is discriminated, a picture is
projected on a television or a fanfare is emitted with synthesizer sounds to
express the hit by a hit expressing part 6 of the teletext processing part 1.
Thus, the customer is more deeply impressed with the hit.
